

**BNSF**

The Burlington Northern  
and Santa Fe Railway Company

March 22, 2000

To whom it may concern:

Dan R. Dalton Inc.- Structural Steel Flame Straightening has worked for the B. N. S. F. on numerous occasions. His firm has helped us get back into service on bridges after derailments; ship hits on drawbridges and other catastrophic problems. They have always responded immediately and have been able to help us get back into service in a most efficient manner. We have also used his firm to shrink loose I bars.

We at B. N. S. F. have found Dan Dalton and his company to be one of our most reliable partners in bridge damage repairs. I recommend him and his firm highly for any bridge repairs.
